DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-15 are rejected under 35 U.S.C. 102(b) as being anticipated by United States Patent Application Publication 2003/0034438 to Sherrer et al.

Sherrer et al (hereinafter Sherrer) discloses an optical alignment system comprising an optical board connector with a ferrule assembly (20) terminating a plurality of optical fibers (24) and a circuit board (26) comprising a cavity (30) for at least one embedded device (36), said circuit board comprising first positioning elements (22) characterized in that said circuit board comprises a plate (84) exposing said cavity and ferrule assembly comprises second positioning elements (holes 28) adapted to cooperate with said first positioning elements made available by said plate to align terminated optical fibers and said embedded device.

As to claim 2, the positioning elements are separate alignment rods.

As to claim 3, the holes (28) mate with the alignment rods.

As to claims 4 and 14, the plate serves as a spacer with rods that go through them.

As to claim 5, pins protrude into the circuit board.

As to claims 6 and 13, more holes (54) are shown.

As to claim 7, the “pit” houses the embedded device.

Art Unit: 2883

As to claim 8, the ferrule is movably contained by the connector (Sherrer aligns and secures).

As to claim 9, the spacer serves as a plate.

As to claim 10, a fiber ribbon is disclosed.

As to claim 11, the holes are on a flat edge.
